(54) METHOD FOR PRODUCING FLUFFED LEATHER-LIKE SHEET

(57)Abstract:

PROBLEM TO BE SOLVED: To provide a fluffed leather-like sheet having excellent appearance, touch and physical properties and produced by using an aqueous dispersion of a polyurethane and provide a method for the production of the sheet.

SOLUTION: The method for producing the leather-like sheet comprises the treatment of a sheet containing ultrafine polyester fibers having a single fiber fineness of ≤ 0.5 dtex as a main component with an alkaline aqueous solution and the application of a cationic water-dispersed polyurethane to the treated sheet.

LEGAL STATUS

[Date of request for examination] 03.12.2004

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]
